HARBOR ISLAND PARK

Village of Mamaroneck, New York

Ecosystem Restoration Study

FACT SHEET

DESCRIPTION: The project is located in the Village of Mamaroneck and includes two areas on Mamaroneck Harbor, Guion Creek and the West Basin. The two sites were identified in a Westchester County sponsored intermunicipal watershed management plan as being environmentally important but degraded salt marsh areas. Restoration efforts could include recontouring the shoreline, removing invasives, and replanting with appropriate wetland vegetation. This would result in improved water quality and a diversification of viable habitat for fish and wildlife.

AUTHORIZATION: Section 206, Water Resources Development Act of 1996, as amended [33 U.S.C. 2330].

STATUS: The preparation of a Preliminary Restoration Plan (PRP) was initiated in October 2003. Upon its completion and coordination with the potential non-Federal sponsor, a Project Management Plan (PMP) for the feasibility study phase will be prepared in FY04. The project is postponed for the rest of FY2004 due to programmatic constraints on Aquatic Ecosystem Restoration (Section 206) projects.

PROJECT COST:

Estimated Federal Cost	\$ 10,000
Estimated Non-Federal Cost	<u>0</u>
Total	\$ 10,000
